

CAMBRIDGE CRYPTOGRAPHIC

Laying the foundations for cryptocurrencies of the future

Proof-of-Deposit:

A game-changing innovation

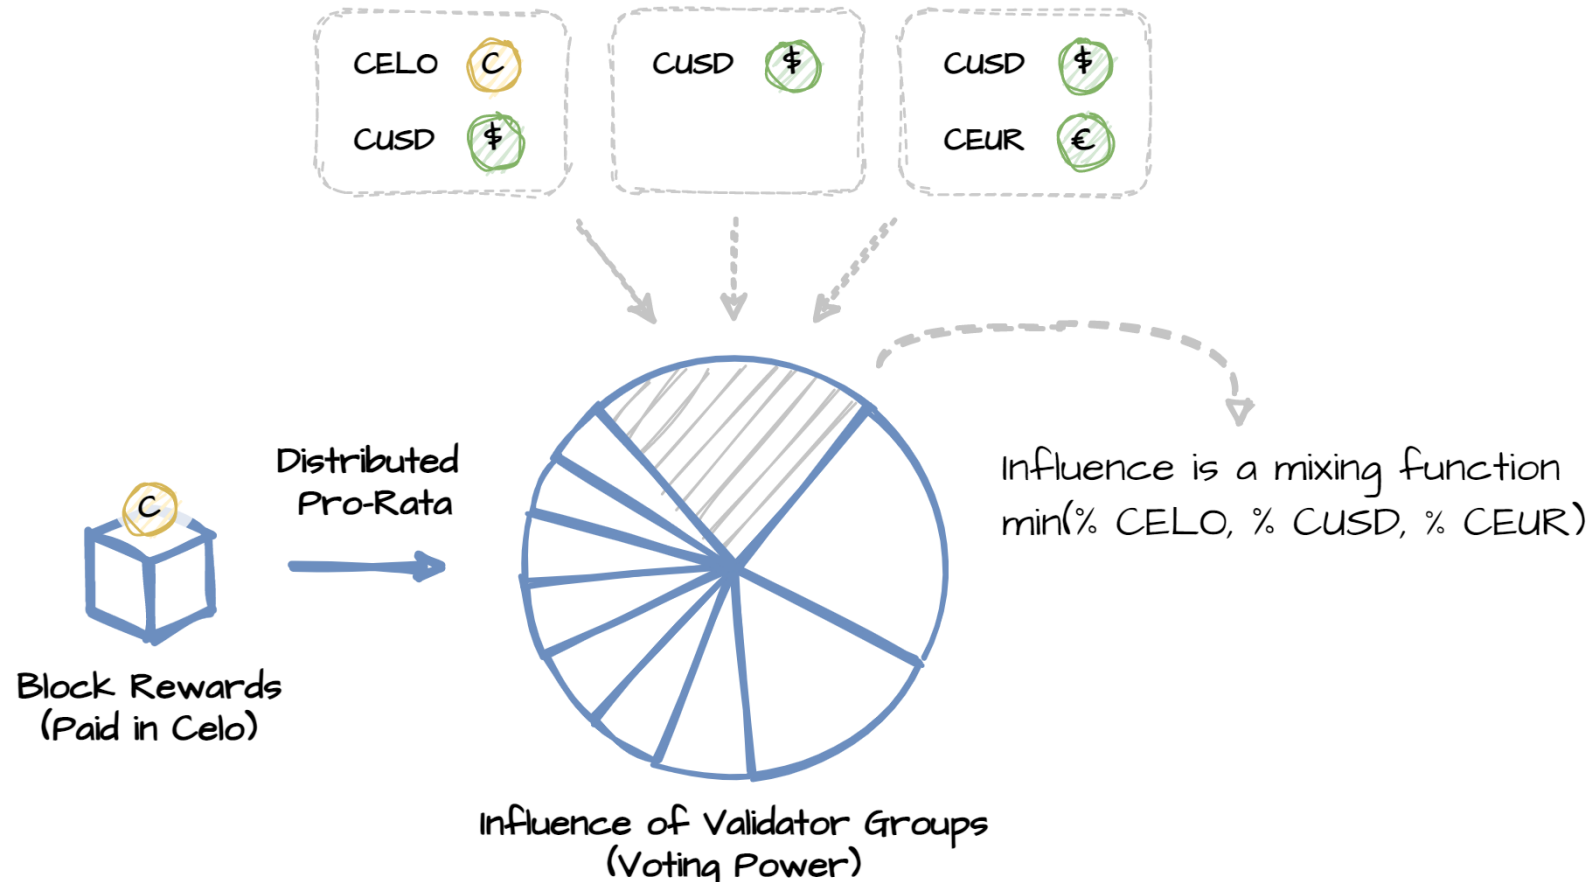

- Taps into the most important userbase:
 - Those that cannot or do not want to take risk with their money
 - e.g. the Unbanked, regulated custodians, etc
- Amplifies demand for CELO and stablecoins
- A new tool for central banks: monetary policy with configurable discretion

Proof-of-Deposit:

The core idea

LockedTokens, users can vote with CELO and/or Stablecoins

Demonstration Time!

<https://hackathon.cambridgecryptographic.com/>

We implemented the following:

- Modified *LockedGold* → *LockedToken* (compatible with any ERC20)
 - Modified *Election* → Compatible with multiple *LockedToken*
